## Product highlights

### Voice Recording Function

Voice Recording Function converts your player into a handy dictation machine. Besides playing music or listening to radio, you can also record notes or reminders for work or school, record shopping lists and phone numbers – even song lyrics. By pressing the recording button and speaking into the built-in microphone, voice messages are compressed and stored either in the built-in internal memory or on to the external memory card. Voice Recording Function gives you a highly portable voice recorder allowing you to record anything, anytime and anywhere!

### Integrated jack headphones

Specially-designed headphones with an integrated jack allow listeners to plug in additional headphones. Two people can enjoy the same music at same time, via their own headphones.

### Equalizer

Equaliser allows you to select preset modes that optimise certain frequency bands to enhance specific music styles. Players with Equaliser, utilise graphic equalising technology to automatically set the optimum sound frequency balance for a chosen music style. The Equaliser allows you to enjoy the optimum sound depending on the music style.
